Computer Modern Web Fonts

The Computer Modern Font Family (the default LaTeX font), delivered on the web.

Usage

Link this stylesheet: <https://cdn.jsdelivr.net/gh/aaaakshat/cm-web-fonts@latest/fonts.css> in your html `<head>` .

HTML Code

```
<link rel="stylesheet" type="text/css" href="https://cdn.jsdelivr.net/gh/aaaakshat/cm-web-fonts@latest/fonts.css">
```

Web demo

Check out <https://checkmyworking.com/cm-web-fonts/> to get download links and see a customisable demo of the Computer Modern font family. Or visit [TeXBlog](#) to view a working implementation of a site fetching from this CDN.

Example Code

```
<head>
<!-- Other imports... -->
<link rel="stylesheet" type="text/css" href="https://cdn.jsdelivr.net/gh/aaaakshat/cm-web-fonts@latest/fonts.css">
<style>
  body {
    font-family: "Computer Modern Serif", serif;
  }
</style>
</head>
```

License

The font is licensed under the [SIL Open Font License](#). The license gives you permission to use them online and redistribute/modify/study them so long as you keep the resulting fonts under the Open Font License. *I'm not a lawyer and I can't give legal advice, so make sure to read the [official OFL FAQs](#).*

Fonts

The following font families are included (with bold and italics):

- 'Computer Modern Bright'
- 'Computer Modern Concrete'
- 'Computer Modern Sans'
- 'Computer Modern Serif'
- 'Computer Modern Typewriter'

Delivery

Files are served via jsDelivr, an free, open-source CDN supported by companies like CloudFlare. jsDelivr serves ~72 billion requests/month and is has been reliable for me; however, there's no such thing as a free lunch and I cannot guarantee 100% uptime. Use it at your own risk.

Credits

Repo forked from [@dreampulse](#), cm-unicode web fonts compiled by [Christian Perfect](#) from the [Computer Modern Unicode fonts](#) created by Andrey V. Panov. The original Computer Modern fonts were created by Donald Knuth et al.
